VACUUM THERAPY THE PRACTICAL SOLUTION

Although other treatments for ED (e.g. Viagra®, Injections and Penile implants) are widely used today, Vacuum Therapy is gaining increasing popularity by patients and their physicians because of the very positive associated benefits. In fact, Vacuum Therapy should be used as a daily exercise to prevent atrophy and to promote penile health. Evidence from leading urologists promotes the idea that this treatment improves penile health by restoring adequate blood flow and revitalizing vascular tissues.

THE VACURECT™ THE ULTIMATE IN VACUUM THERAPY

The Vacurect™ is setting a new standard in vacuum therapy, and has already restored thousands of relationships. The Vacurect™ is compact, efficient, and simple to operate. It uses a natural pumping action that does not detract from natural intimacy. The Vacurect™ uses a unique double-sealing Tension System that ensures maximum efficiency. Even better, the Vacurect™ comes with 10 Tension Systems of different sizes that last up to three years (no costly Tension Systems to buy every 3 months!)

Actual Dimensions
8.75 inches long by 1.75 inches wide

Other Vacuum Pumps typically are bulky, cumbersome, hard to incorporate during foreplay and not sexually appealing. These qualities proved to be significant drawbacks to the advancement of vacuum therapy among patients.

The Vacurect™ is the first and only system that allows you to enjoy the benefits of Vacuum Therapy without the drawbacks. The Vacurect™ is one-piece, easy to use, very compact, and always reliable.

HOW THE VACURECT™ WORKS

STEP 1
Attach the tension system to the base of the cylinder by pressing firmly.

STEP 2
Apply a dime size amount of personal lubricant on the index finger and apply to the glans head of the penis. Apply the excess lubricant to the opening of the tension system.

STEP 3
Gently rest the tip of the penis in the opening of the tension system.

STEP 4
Move the sleeve up and down the cylinder to create the vacuum; this will draw the penis through the tension system into the cylinder.

STEP 5
After creating the erection, remove the cylinder from the tension system, leaving the tension system in place at the base of the penis.

BENEFITS OF VACUUM THERAPY

Recommended by physicians
because it has clinically proven to be:

EFFECTIVE for more than 90% of men; the Vaculect™ can be applied successfully, regardless of the cause of ED.

SAFE unlike medication or surgery, vacuum therapy uses only natural erection processes without any side effects.

IMMEDIATE produces an erection suitable for intercourse in less than 60 seconds.

CONTROLLABLE the patient determines when, how long, and how often he wants intimacy.

CONSISTENT the same erection each and every time, regardless of other physical and/or psychological factors.

COST EFFECTIVE relatively little cost compared to other ED treatments.
